## **GKI-ERSTE ECONOMIC SENTIMENT INDEX AT ITS DECADE PEAK**

In December the GKI-Erste economic sentiment index adjusted for seasonal effects continued its spectacular rise, after doing similarly almost constantly throughout the year. According to the empirical survey conducted by GKI ([www.gki.hu](http://www.gki.hu)) with the support of the EU optimism not seen for more than a decade reigned in Hungary at the end of the year.

In December in the **business sphere** expectations became more upbeat in all sectors, particularly in commercial and service companies. The overall proportion of optimistic companies is now more than that of pessimists, which has not been experienced since the end of 2010. Only the construction confidence index remained in negative territory. In **industry**, the assessment of production and orders (including export orders) of both the last and next periods improved. In **construction**, following a slowdown in November, pessimism continued to decrease in December. Opinions over the level of production and the stock of orders in the preceding three months improved considerably compared to November. The confidence index of **trade** increased very significantly. The assessment of sales positions, stock levels and expected orders all picked up. **Service** companies assessed the expected sales revenues especially better than in November, and their opinion on the general business climate also improved. However, respondents perceived the turnover in the preceding period deteriorating.

**Intentions to employ** improved slightly in all sectors except construction, where they remained unchanged. The fear of unemployment of households eased. Intentions to **raise prices** increased in industry, whereas deflationary pressures eased in construction. In trade the share of firms planning price rises decreased, and so did slightly the size of price rises as well. In services those anticipating price decreases are in majority, too. The inflationary expectations of consumers eased as well. The assessment of the **perspectives of the Hungarian economy** improved much in all sectors, and the opinion of households also picked up.

After three months of very strong growth, **GKI's consumer confidence index** only slightly increased further in December; however, it approaches its climax after the 2010 elections. In December households assessed their financial situation for the following year better and their saving capacity somewhat worse than in November.

**EXPLANATION TO THE METHODOLOGY:**

In line with the methodology used by the EU, GKI surveys the expectations of industry, trade, construction, services and households in the calculation of its business confidence index. GKI-ERSTE economic sentiment index is the weighted average of the consumer confidence index and the business confidence index.

The business confidence index is calculated from the responses of enterprises in industry, trade, construction and services given to questions concerning the state of business and expectations of turnover and employment. (As far as services are concerned, similarly to the practice of the EU, companies of the financial and public sectors have not been included in the surveys yet.) GKI publishes seasonally adjusted data by using appropriate mathematical methods to filter out the discrepancies caused by seasonal effects (e.g., differences in weather conditions between winter and summer, increased demand before Christmas, lower output because of summer vacations).

The consumer confidence index is calculated from responses given to questions concerning the expected financial position of households, the expected economic and unemployment situation of the country, and the prospects for saving.

## GKI-ERSTE ECONOMIC SENTIMENT INDEX AND ITS ELEMENTS, 2008-2013

Year	Month	Business confidence index	Consumer confidence index	GKI-Erste economic sentiment index
2008.	I.	-9.6	-47.8	-19.5
	II.	-7.6	-47.6	-18
	III.	-8.1	-52.4	-19.7
	IV.	-11.8	-55.4	-23.2
	V.	-7.7	-52.3	-19.3
	VI.	-9.1	-46.1	-18.7
	VII.	-8.2	-42.9	-17.2
	VIII.	-9	-43.5	-18
	IX.	-9.8	-42.5	-18.3
	X.	-15	-54	-25.2
	XI.	-25	-56.7	-33.2
	XII.	-28.1	-60.8	-36.6
2009.	I.	-30.3	-66.1	-39.6
	II.	-33.9	-68.5	-42.9
	III.	-37.4	-70	-45.8
	IV.	-36.3	-72.3	-45.7
	V.	-29	-68.3	-39.2
	VI.	-28.9	-64.3	-38.1
	VII.	-24.7	-63.1	-34.7
	VIII.	-22.2	-59.8	-32
	IX.	-22.1	-56.9	-31.2
	X.	-17.8	-50.8	-26.4
	XI.	-19.1	-51.9	-27.6
	XII.	-15.9	-50.1	-24.8
2010.	I.	-14.1	-49.1	-23.2
	II.	-13.7	-47.5	-22.5
	III.	-10.5	-41.2	-18.4
	IV.	-10.3	-37	-17.3
	V.	-8.9	-28.7	-14
	VI.	-9.5	-23.4	-13.1
	VII.	-7.1	-29.3	-12.8
	VIII.	-4.7	-23.4	-9.5
	IX.	-6.7	-25	-11.5
	X.	-5.2	-20.6	-9.2
	XI.	-3.1	-20.8	-7.7
	XII.	-1.8	-24.1	-7.6
2011.	I.	0.5	-25.8	-6.3
	II.	2.9	-27.7	-5.1
	III.	-1.3	-37.3	-10.7
	IV.	0.6	-36.8	-9.1
	V.	-4.3	-38.5	-13.2
	VI.	-4.4	-41	-13.9
	VII.	-6.9	-42	-16
	VIII.	-11.3	-40.7	-18.9
	IX.	-11.7	-47.2	-20.9
	X.	-14.9	-49.8	-24
	XI.	-14	-49.5	-23.2
	XII.	-14.5	-53.3	-24.6

Year	Month	Business confidence index	Consumer confidence index	GKI-Erste economic sentiment index
2012.	I.	-16.3	-56.6	-26.8
	II.	-12.4	-51.2	-22.5
	III.	-8.1	-49.9	-19
	IV.	-9	-48.8	-19.3
	V.	-14	-55.9	-24.9
	VI.	-14.6	-52.6	-24.5
	VII.	-13.3	-51.4	-23.2
	VIII.	-14.9	-52.7	-24.7
	IX.	-16.4	-49.5	-25
	X.	-14.6	-53	-24.6
	XI.	-12.4	-50.7	-22.4
	XII.	-11.3	-49.3	-21.2
2013.	I.	-11.3	-43.4	-19.6
	II.	-12.0	-40.9	-19.5
	III.	-11.9	-37.3	-18.5
	IV.	-15.6	-38.9	-21.7
	V.	-10.5	-34.4	-16.7
	VI.	-6.9	-37.3	-14.8
	VII.	-8.6	-35.3	-15.5
	VIII.	-6.3	-36.9	-14.3
	IX.	-4.8	-31.0	-11.6
	X.	-2.3	-29.4	-9.3
	XI.	-0.1	-23.3	-6.1
	XII.	4.0	-22.7	-2.9
