

## ***BUSINESS EXPECTATIONS DETERIORATED IN JULY***

In July the GKI-Erste economic confidence index adjusted for seasonal effects fell to the level of the end of 2014, which had been still relatively high. According to the empirical survey conducted by GKI ([www.gki.hu](http://www.gki.hu)) with the support of the EU both business and consumer expectations declined compared to their peak in April. However, in July the change in mood resulted only from the fall of the business confidence index. The consumer confidence index has remained almost unchanged since May.

In the **business sphere** expectations deteriorated in all sectors except construction in July compared to the previous month. However, the number of companies expecting improvement still slightly exceeded the number of those expecting deterioration. The **industrial** confidence index has been declining for the third month. The evaluation of the production level of the preceding and the next periods, as well as that of orders deteriorated, whereas that of export orders definitely improved. Although the **construction** confidence index barely rose in July, it reached its twelve-year peak. The evaluation of the production level of the past three months became significantly better, whereas that of orders improved slightly. In **trade**, the assessment of sales positions and expected orders became unfavourable. In July the **services** confidence index fell to the same extent as it grew in the previous month. Opinions about the business climate of the past period and the retail trade turnover in the next quarter deteriorated.

In most sectors the share of those expecting **price increase** is almost equal to that of those expecting reduction. However, inflationary expectations slightly increased in trade and among consumers. The **intentions of employment** deteriorated markedly in industry and services, whereas they picked up slightly in construction and trade. The share of those planning recruitment remained somewhat above those planning layoffs in all sectors. The assessment of the **perspectives of the Hungarian economy** remained unchanged among households and in construction, whereas it deteriorated in other sectors. However, in the business sector optimism still prevail.

The **GKI consumer confidence index** has remained virtually unchanged for three months. Households felt their future financial situation and the possibility of purchasing high-value durables somewhat more favourable, whereas they assessed their savings capacity slightly worse than in June.

## EXPLANATION TO THE METHODOLOGY:

In line with the methodology used by the EU, GKI surveys the expectations of industry, trade, construction, services and households in the calculation of its business confidence index. GKI-ERSTE economic sentiment index is the weighted average of the consumer confidence index and the business confidence index.

The business confidence index is calculated from the responses of enterprises in industry, trade, construction and services given to questions concerning the state of business and expectations of turnover and employment. (As far as services are concerned, similarly to the practice of the EU, companies of the financial and public sectors have not been included in the surveys yet.) GKI publishes seasonally adjusted data by using appropriate mathematical methods to filter out the discrepancies caused by seasonal effects (e.g., differences in weather conditions between winter and summer, increased demand before Christmas, lower output because of summer vacations).

The consumer confidence index is calculated from responses given to questions concerning the expected financial position of households, the expected economic and unemployment situation of the country, and the prospects for saving.

## GKI-ERSTE ECONOMIC SENTIMENT INDEX AND ITS ELEMENTS, 2008-2014

Year	Month	Business confidence index	Consumer confidence index	GKI-Erste economic sentiment index
2008.	I.	-9.6	-47.8	-19.5
	II.	-7.6	-47.6	-18
	III.	-8.1	-52.4	-19.7
	IV.	-11.8	-55.4	-23.2
	V.	-7.7	-52.3	-19.3
	VI.	-9.1	-46.1	-18.7
	VII.	-8.2	-42.9	-17.2
	VIII.	-9	-43.5	-18
	IX.	-9.8	-42.5	-18.3
	X.	-15	-54	-25.2
	XI.	-25	-56.7	-33.2
	XII.	-28.1	-60.8	-36.6
2009.	I.	-30.3	-66.1	-39.6
	II.	-33.9	-68.5	-42.9
	III.	-37.4	-70	-45.8
	IV.	-36.3	-72.3	-45.7
	V.	-29	-68.3	-39.2
	VI.	-28.9	-64.3	-38.1
	VII.	-24.7	-63.1	-34.7
	VIII.	-22.2	-59.8	-32
